

LC-LFV2-100

Third Angle Projection Units: mm

Converts diffused light into parallel light

Light Control Films

LC Series

Plastic film arrayed with fine louvers suppresses the diffusion of light in specific directions and improves parallelism.

Mounted to back lights to suppress light diffraction for visual inspections, enabling sharp imaging of profiles.

LC-LDL-TP-27x27	LC-LFL-100
LC-LDL-TP-43x35	LC-LFL-180
LC-LDL-TP-51x51	LC-LFL-200
LC-LDL-TP-63x60	
LC-LDL-TP-83x75	
LC-LDL-TP-100x100	

By mounting this on a co-axial light, the parallelism of light is improved and the particularities of a workpiece can be effectively imaged.
