

# virtual encoder 5190

- virtual encoder
- data input / output voltage 5V RS485
- 1 interface
- differential input / output

I/O

## Pinout

LED:	Pin	Signal	Description
	0	A	activity
	1	B	activity
	4	Zero	activity
	5	I 0	
	6	I 1	
	E:	failure	red
	P:	power supply	red

Pin	Signal	Description
1	A	5VDC diff.
2	/A	5VDC diff.
3	B	5VDC diff.
4	/B	5VDC diff.
5	zero	5VDC diff.
6	/zero	5VDC diff.
7	I 0	input
8	/I 0	input
9	I 1	input
10	/I 1	input
11	Power	VCC
12	Power	0V
13	Power	VCC
14	Power	0V

All Power VCC and Power 0V are internal connected

## Attributes

### Dataformat:

### Applications:

This print contains a programmable virtual 16 bit incremental counter. Two different operating modes are possible:

- Master: The virtual encoder distributes position-signals.
- Slave: The virtual encoder is reading in position-signals.

available prints :

- @P5190L: virtual encoder, 5VDC input/output

### Related Applications:

The virtual encoder works only together with the virtual encoder repeater.

- @P5191R: virtual encoder repeater, 5V output

digital

output

## Electrical Data

Power supply external.....	GND required, see notes, VCC max. 24V= ±20%, optional
Supply current.....	5mA at 24 V
Operating current @ctiveBus.....	45mA at 3,3V / 20mA at 5V
Input protection .....	30V overvoltage, 5V overvoltage
Counter .....	16 bit
Limiting frequency .....	0,65kHz-333,3kHz

# virtual encoder 5190

## System Information

System ID .....	0X0281
System address space .....	48 bit in, 48 bit out

## Environmental Conditions

Electromagnetic compatibility (EMC) .....	EN 61000-4-2 (IEC-801-2) / EN 61000-4-4 (IEC-801-4)
operating temperature [°C] .....	0..+55
storage temperature [°C] .....	-20 .. +70
humidity (rel) .....	98 % (non condensing)
protection class* .....	IP 20 (DIN 40 050)
*The protection class is valid only with housing and connector installed	

## Mechanical Data (effective if mounted in @M housing)

Weight .....	approx. 0.05 kg including connector (PCB only)
Dimension .....	105mm x 80mm x 12mm (PCB only)

## Drawing (effective if mounted in @M housing)

## Ordering Key

@		5	1	9	0	L	-	5	1	9	1	R
						L= left slot						R= right slot
					0= Master							1= repeater
				9= virtual encoder								
			1= 1 interface									
		5= digital interface										
	P= print only											
	X= print and cap											
	M= print and housing											

P5190L works only if used with P5191R (virtual encoder repeater). Single use is not possible.

## virtual encoder 5190

**notes:**

**Caution:**

Power 0V has to be directly connected with power 0V of the interface partner and power 0V of the controller-module.
